

# **A Guide to Securities Issued by the United States Government, 1861 - 1975**

## **Part III: An Inventory of Issues by Fiscal Year**

Dr. Franklin Noll  
Produced at the Historical Resource Center, Bureau of Engraving and Printing,  
Washington, DC

## Introduction

Welcome to a listing of securities issued by the United States Government from 1861 to 1975. Issues are listed by fiscal year with each year starting on a new page.

For each year, the issues are grouped by type of debt they represent and then type of instrument. I determined the type of instrument according to the financial terms of the instrument (primarily length of maturity) and, when available, the Treasury's official designation of the security. Within each grouping, instruments are listed in alphabetical order. Any dates appearing in square parentheses, especially in the case of Treasury bills, represent issue dates.

This listing contains only debt issues. It does not include equity instruments or Treasury warrants or other drafts used by the Treasury for strictly accounting purposes.

The database contains roughly 13,000 individual issues. As you will note, a certain instrument may be issued repeatedly over a number of years. In these cases, each issue is counted as a separate instrument.
